

## Fonality in the Press:

Fonality...is one of the most successful names in a growing niche of companies developing business phone systems on an open-source software platform called Asterisk.

- Bruce Meyerson, *Associated Press*  
February 2007

Fonality's PBXtra platform was selected as the all-around best option for its cost-effective, features-rich platform.

- *VoIP News*  
February 2006

Fonality is turnkey, plug-and-play 'Asterisk on steroids' with a user-friendly Web interface... that is perfectly suited for small businesses.

- Tom Keating, *Internet Telephony*  
June 2005

Fonality's PBXtra is our Editor's Choice. It is extremely easy to use and comes loaded with features that will help present a professional image.

- Peter Morrissey, *Network Computing*  
August 2006

Fonality just moved into first place for the telephony Linux vertical stack. This is a trillion dollar market, one in which Microsoft doesn't have the technology to respond with.

- Brian Aker, *Krow Live Journal*  
October 2006

But what pushes [Fonality] over the line from discounting to disruption is that it also offers small and now medium-sized businesses the kinds of PBX functionality that previously only large enterprises could afford.

- Robert Poe, *VoIP News*  
November 2006

Fonality is growing at a monthly rate of 10 percent, which represents triple-digit growth in percentage terms over the past year.

- Eric Auchard, *Reuters*  
February 2007

Fonality is emerging as a fleet big brained mammal as yesterday's PBX business dinosaurs are seemingly doomed to extinction.

- AlecSaundersLog.com  
November 2006

Lyman is the charismatic leader of one of the IP PBX market's hottest companies, Fonality. He is also known to publicly call out or respond to his critics and gets bonus points at VoIP News for doing so.

- *VoIP News*  
November 2006

Intel is betting that Fonality, which requires Intel-based PCs to run its phone software, will help it boost chip sales and capture a larger share of the small- to medium-size business market.

- Olga Kharif, *Business Week*  
February 2007

These are great numbers, numbers which rank Fonality as one of the top open source companies in the industry.

- Matt Asay, *Infoworld*  
February 2007

Fonality, a leading open source telephony company that offers VoIP solutions for the small business, announced today a new enterprise telephony appliance that is sure to make VoIP for the SMB easier to implement and more secure.

- Joanna Stern, *LAPTOP Magazine*  
March 2007

## Fonality's Happy Customers:

It just works!!!! This was one of the first pieces of technology that I have used that worked out of box... Great Job. Love the product.

- *TriCon Technical Services*  
Calgary Alberta, Canada

It seemed too good to be true for the price... PBXtra is easy to deploy and maintain. I set up the phones and server and Fonality support staff took care of the rest.

- *Durand and Associates*  
Saint Paul, MN

The phone system is amazing and the customer/technical support has been stellar. Thanks so much.

- *Standout Designs*  
Milton, PA

We chose Fonality mostly based on my contact with the people there and was impressed with them. Fonality gives us the best support of any technology I have ever worked with.

- *West Group Research*  
Phoenix, AZ

I just wanted to drop a line and thank you on how stable and feature rich Fonality has become for us... In the year and a half of using it, it has really evolved and become a system that handles our 1000+ calls a day and handles the queue calls in a correct fashion and makes it easy to control the call from the operators stand point. I appreciate the improvements and I have not had to open a ticket in over 5 months since this thing is just humming.

- *Redline Motorsports*  
Las Vegas, NV

Love, love, love it. Bang for the buck, it hands down beats anything else I've looked at. Fonality's support is pretty good too but I've never had to call on them for anything mission critical (which should be a testament to the product all by itself).

- *Auto-Graphics, Inc.*  
Pomona, CA

PBXtra's features alone have given our company the technology edge on our competition.

- *Century21, The Castle Co.*  
Wylie, TX

I would just like to thank your team for the outstanding support we have received thus far. We are extremely impressed and thankful for the immediate attention all of your tech support staff has provided during and after business hours. We are very comfortable with the purchase of our new system.

- *ecomElectronics*  
Brooklyn, NY

Thank Google I found Fonality! (Literally)... It's a testimony to the product and to your company that we, who know nothing, were able to get the system up and running so quickly. We've barely touched it, but it's already light-years ahead of our old system.

- *Orion Logistics, Inc.*  
Hayward, CA

Buried in 12 feet of snow for four days and we never missed a call! Three employees worked from home... we were able to transfer calls back and forth so easily we could barely tell the difference. I think your system was one of the smartest investments I've made.

- *FitzGibbons Agency*  
Oswego, NY

Your product has revolutionized my practice and even increased my bottom line.

- *The Chapar Firm, LLC*  
Conyers, GA

Adding the Fonality PBXtra IP-PBX to Congo Systems product offering introduced us to significant new customer opportunities and enabled Congo Systems to further strengthen relationships with our existing customer base. Fonality's Partner Program has been first rate and the sales support Congo has received from Fonality has been fantastic. Fonality knows IP-PBX phone systems inside and out and most importantly they know just how to assist us in making sure our customers get exactly what they need.

- *Congo Systems*  
Dallas, TX

I can use my simple little T-mobile MDA Mini Pocket PC Phone to administer most functions of PBXtra...that is very cool.

- *Spectrum Electronics*  
Norcross, GA
